QRelix

HOSTED PAGES GUIDE

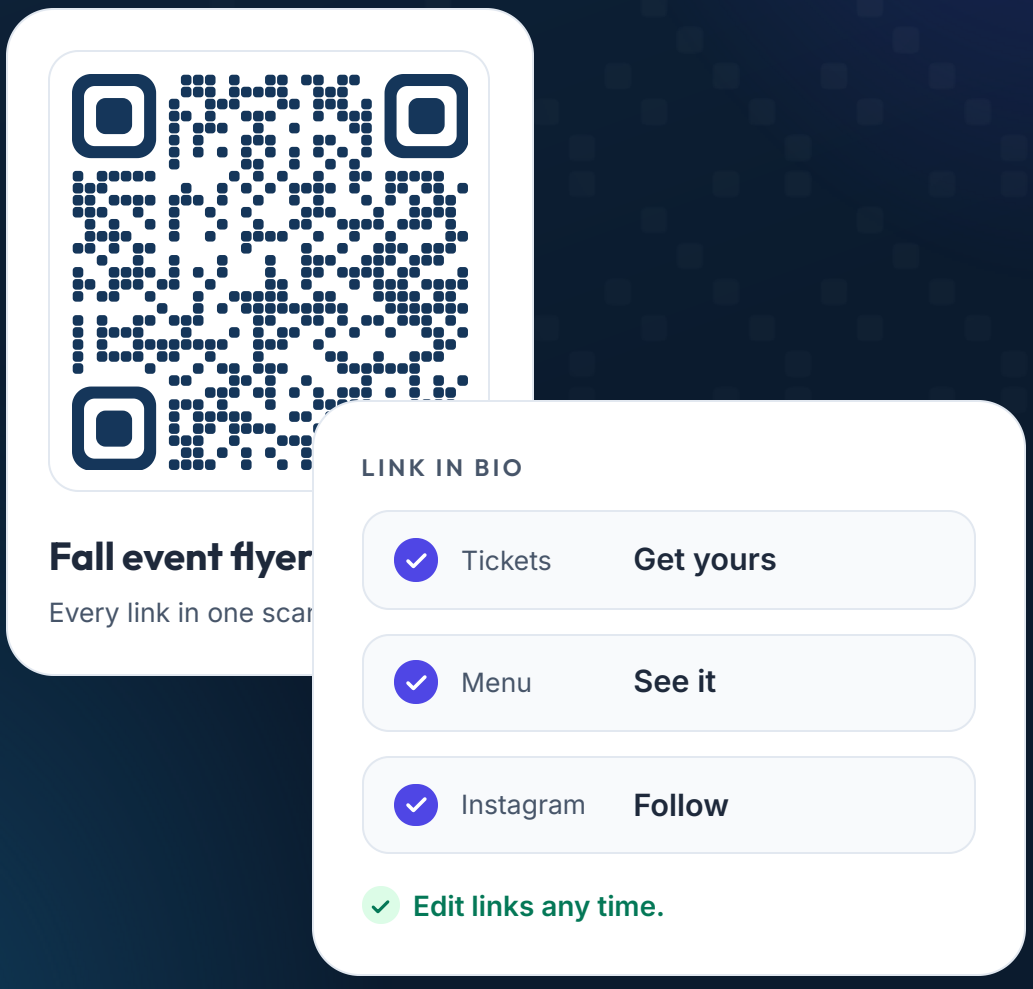

Make a link in bio page

One QR code, all your links: tickets, menu, socials, and more.

1 minute
to finish

Every plan
Free, Pro, and Team

3 steps
with screenshots

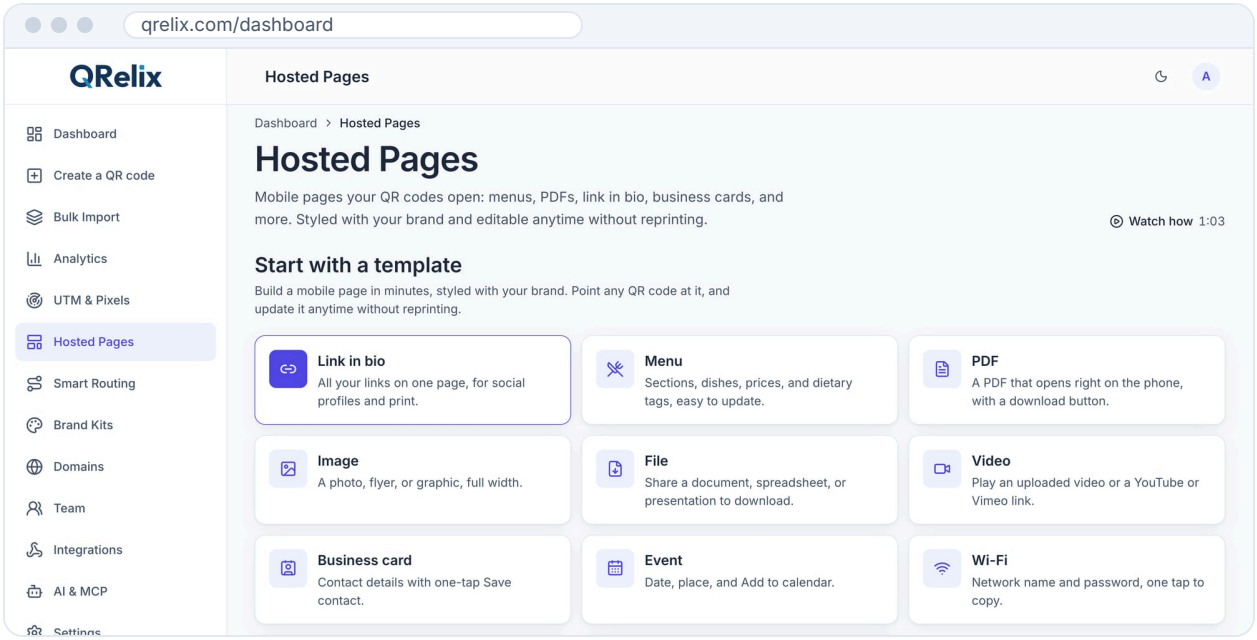

WHY IT MATTERS

One code. Every link.

- **Events** Tickets, schedule, and map
- **Creators** Shop, socials, and booking
- **Cafes** Menu, orders, and reviews

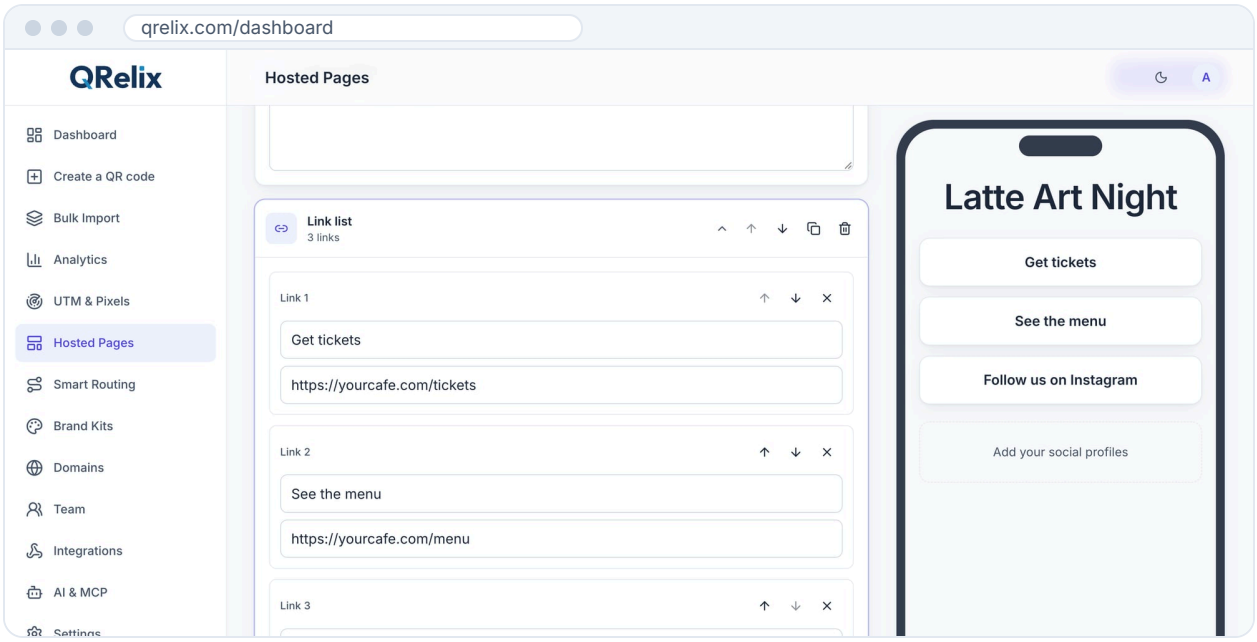

1 Start from the link in bio template

Open Hosted Pages in the sidebar. Under Start with a template, select Link in bio.

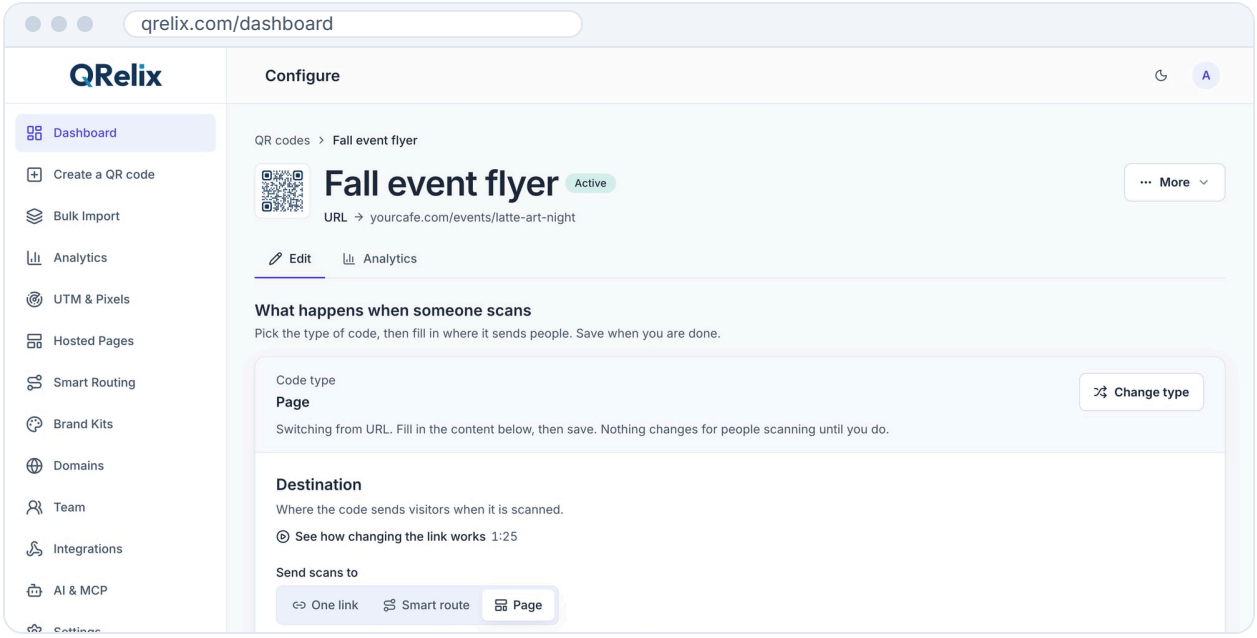

2 Add your links

Give the page a title. For each link, write the button text and paste the address. Select Add link for more, and drag links to reorder them.

3 Point a QR code at it

Open a QR code and select Edit. Under Send scans to, choose Page, pick your link in bio page, and select Save changes.

Good to know

Lead with the main one

Put the link most people want first, and keep the list short.

Track each link

Turn on UTM tags for the code to see which visits came from the flyer.

Use it everywhere

The same page works behind a QR code, in your social profile, and in emails.

Free to start

One hosted page is free. Pro makes hosted pages unlimited.

Create your first smart QR code.

Free plan, no credit card. Edit the link after printing and see every scan.
