SMART ROUTING GUIDE

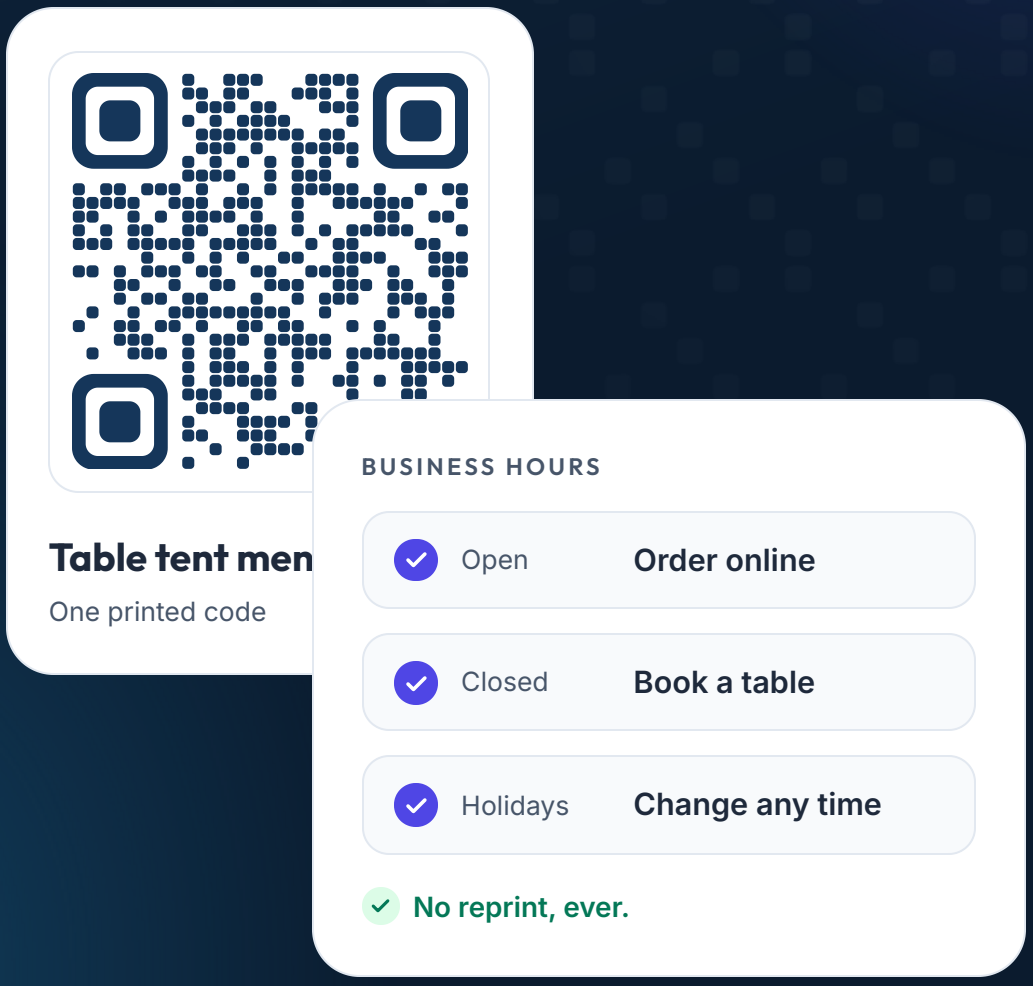

One QR code for open and closed hours

Online ordering while you're open, reservations after you close, from the same printed code.

WHY IT MATTERS

A closed sign shouldn't be a dead end.

- **While you're open** Take the order
- **When hours change** Edit the route, not the print
- **After you close** Take the booking

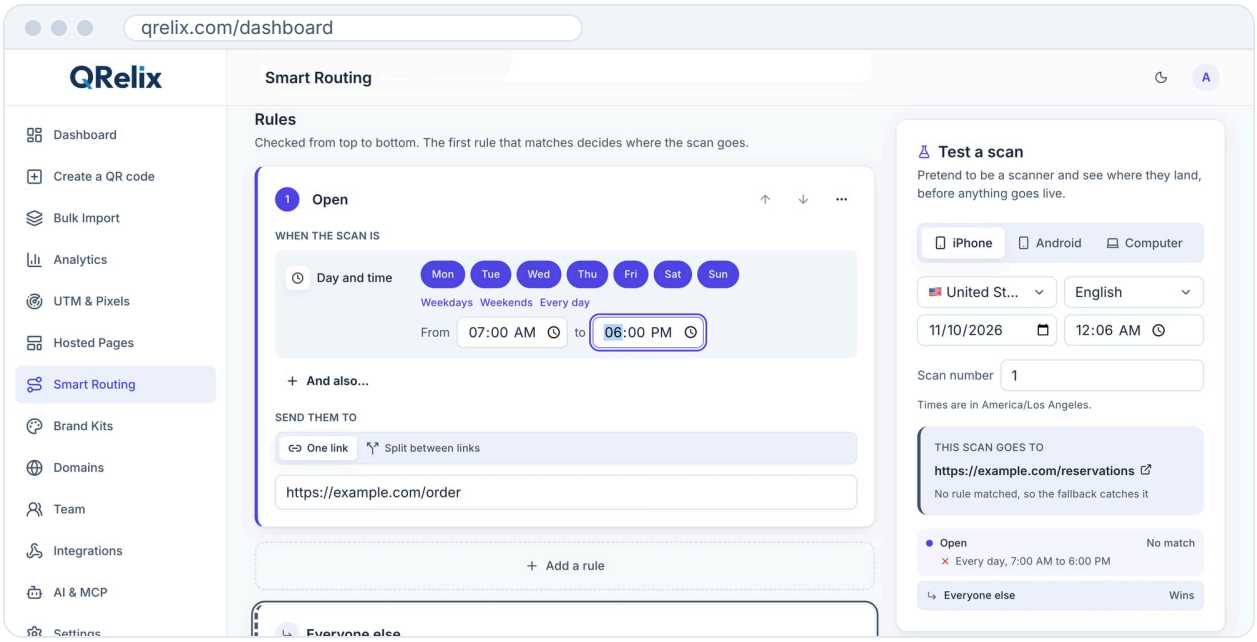

1 Start from the Business hours recipe

Open Smart Routing in the sidebar. Under Start from a recipe, select Business hours. It opens a route with one rule for when you are open and a link for everyone else.

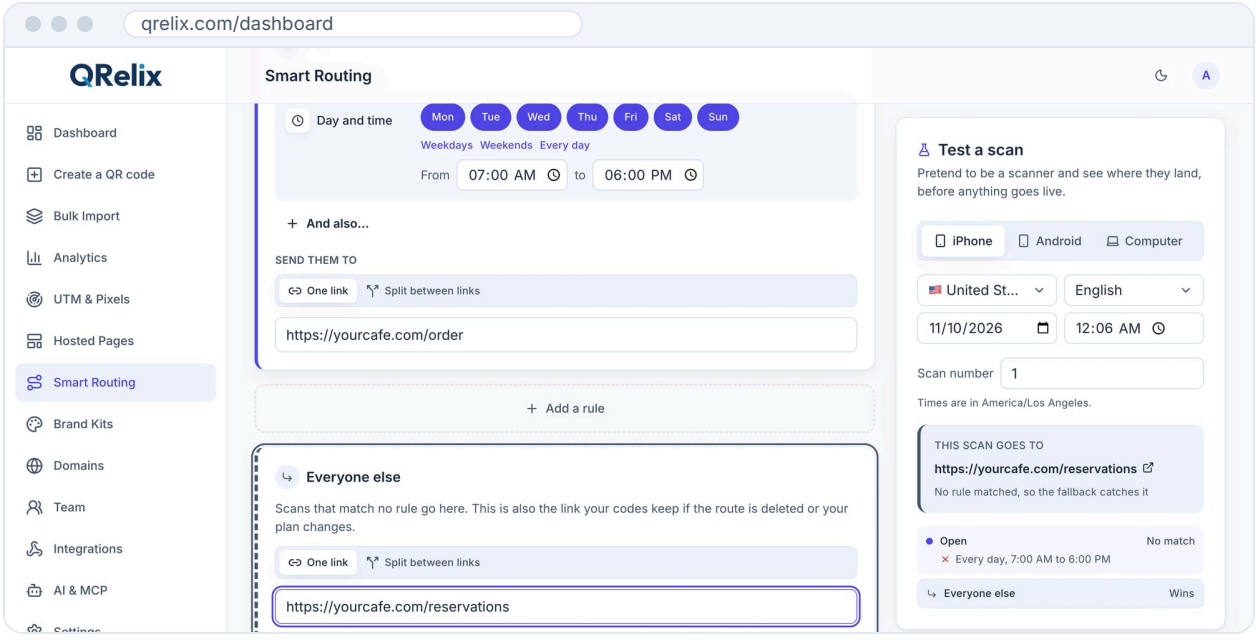

2 Set your opening hours

Name the route and check the time zone. In the Open rule, choose the days you are open and set the From and to times. Hours follow the route's time zone, wherever the scanner is.

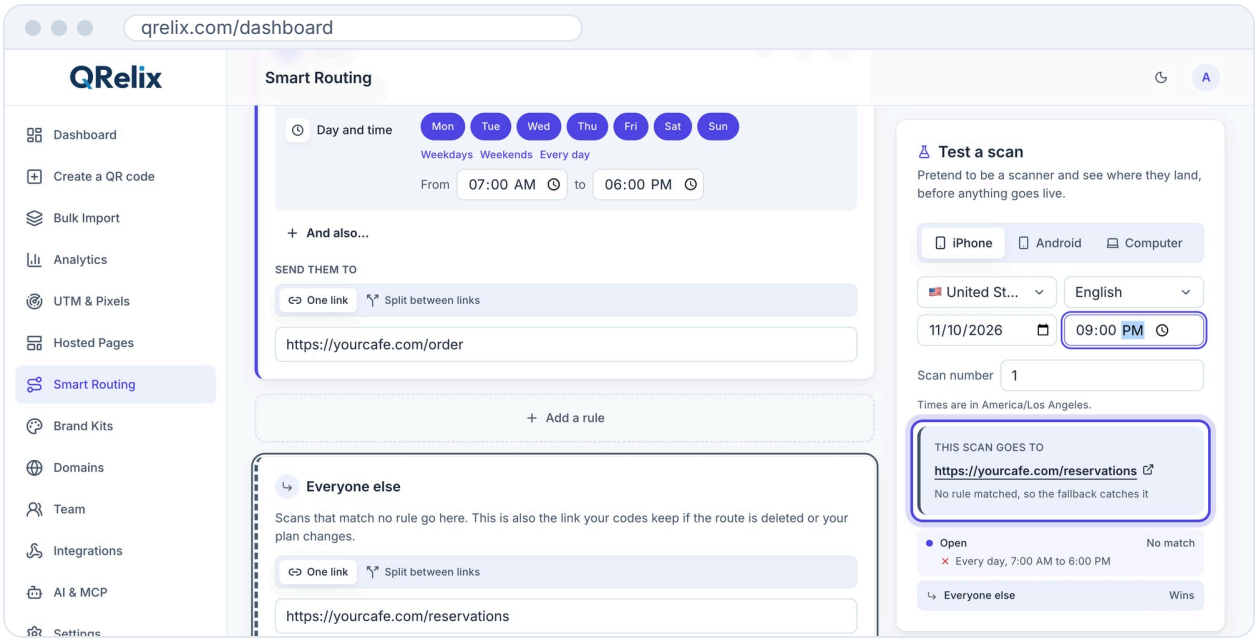

3 Choose a page for open and for closed

In the Open rule, paste the link for scans during your hours. Under Everyone else, paste the link for scans outside them. That link is also what your codes keep if the route is ever deleted.

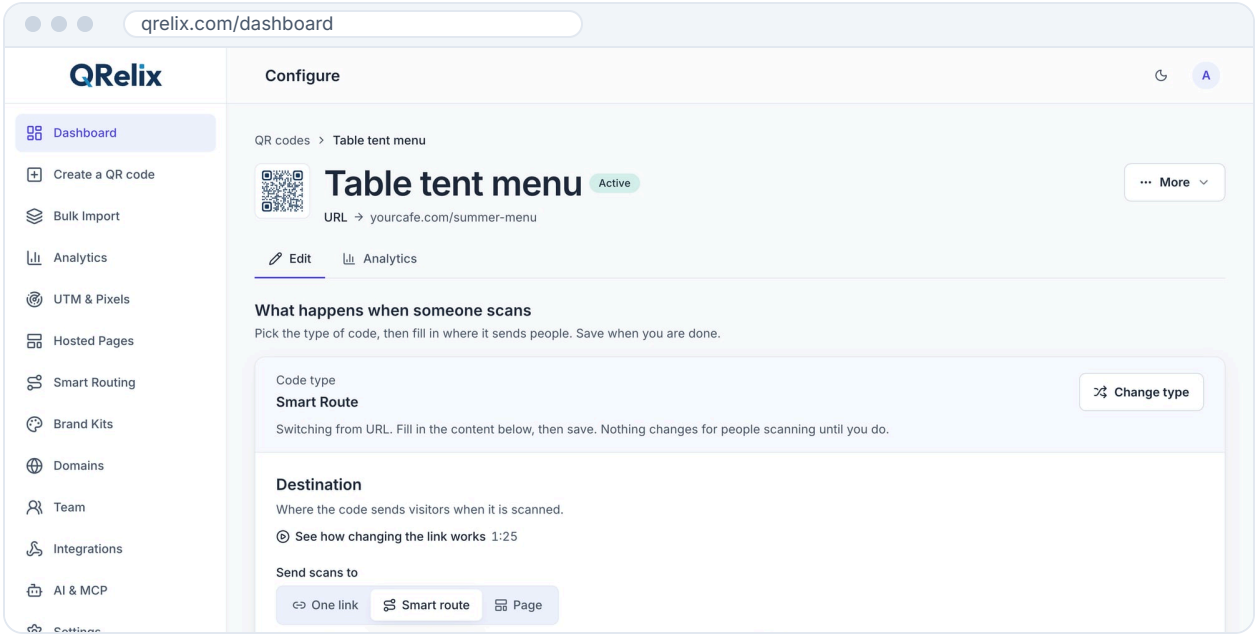

4 Test a late-night scan

In Test a scan, set a scan date and time outside your hours. The panel shows which rule matched and where the scan would go, before anything goes live.

5 Use the route on a code

Open a link QR code and select Edit. Under Send scans to, choose Smart route, pick your route, and select Save changes. One route can run many codes.

Good to know

Add more time slots

Select Add a rule for a breakfast menu, a lunch menu, and a dinner menu. Rules are checked from top to bottom, and the first match wins.

Closed on some days

Turn a day off in the Open rule and scans on that day go to the Everyone else link.

One route, many codes

Pick the same route on your table tents, door sign, and receipts. Change the hours once, and all of them follow.

On Pro and Team

Smart Routing is part of QRelix Pro and Team. If your plan changes, codes keep the Everyone else link.

Create your first smart QR code.

Free plan, no credit card. Edit the link after printing and see every scan.
